Done requirements

Sprint1

What will be done today

- 1-yousefAhmed ,yousef ehab : modify class diagram depend on sprint 1 feedback
- 2- yousef hassan : modify implementation depend on class diagram changes

Current obstacles

There are no obstacles

Current Trello workspace

CS352: Sprint 1 – OtripleY, onlineStorePlatform

Daily scrum meeting template

The screenshot shows a Trello board for 'online market' with a Kanban workflow for 'Sprint 1'. The board is divided into five columns: Requirements, Sprint 1, To Do, Doing, and Done. Each column contains cards with task descriptions and IDs. The background of the board is a mountain landscape.

Requirements	Sprint 1	To Do	Doing	Done
4- Develop a proxy security middleware for authorization and authentication. #14 Non-estimated	1- Develop a web service to let the user able to register in the online market. Each user should be identified by username or email. Each user should provide a password which will be used later to login #11 Non-estimated	Proposed architecture #1 Non-estimated	Meeting minutes for the sprint starting meeting #5 Non-estimated	Git repository #9 Non-estimated
5- Develop a web service to let the user able to add a new store to the online market. The online store information should include the store location (onsite or online), store name, store type (sports, entertainment, clothes, technology, ... etc) and any other relative information. The store will not be added until the online store administrator accepts it. #15 Non-estimated	2- Develop a web service to let the user able to login into the online market by providing username/email and password #12 Non-estimated	Proposed class diagram #2 Non-estimated	Meeting minutes for the sprint standup meetings #6 Non-estimated	Trello board #8 Non-estimated
6- Develop a web service to let the administrator able to add new products to the system. The products info should include product name, price range, category, ...etc. Once the product is added it should be available to the store owner to add it. + Add another card	3- Develop a web service to be used to list all current registered users. #13 Non-estimated	Check the SDS document with the project description #4 Non-estimated	Meeting minutes for the spring retrospective meeting. #7 Non-estimated	+ Add another card
	+ Add another card	Check the Sprint document with the project description #10 Non-estimated	+ Add another card	
		sequence diagrams for each scenario #3 Non-estimated		
		+ Add another card
